

FOR IMMEDIATE RELEASE

Intorrent Technologies Announces Broadvox Interoperability Certification

*Vertical-specific VoIP Deployments for Small and Medium Businesses
Highlight Innovative Communications Suite*

Alpharetta, GA – Intorrent Technologies, a leading provider of Asterisk-based VoIP phone systems for small and medium businesses, has achieved interoperability certification with Broadvox, the premier VoIP, SIP and IP communications supplier in the industry. Intorrent joins the Broadvox reseller team as a certified IP vendor.

Recognizing that no two businesses are the same, Intorrent gears installation and support on thorough consultation and vertical market feature functionality. Broadvox’s SIP Trunking and feature platforms allow Intorrent to configure communications solutions that meet the IP requirements of individual enterprises.

“An Intorrent deployment bolstered by Broadvox provides our end users with a customized, fully-converged communications package,” said Darrell Hensley, Intorrent Technologies managing partner. “Our knowledge base, combined with the advantages of Broadvox’s products, has reshaped the way organizations do business. We’re proud to join Broadvox as a certified vendor, and we look forward to raising the bar for business communications.”

Intorrent offers premise-based and Cloud-hosted IP phone systems for small, medium and home offices. Additional solutions include an information line with Web interface, SMB Intranet and SMB firewall.

“The aim of our combined suite is to upgrade phone, IT and every communication touchpoint in a way that’s manageable, economical and scalable,” said Hensley. “We now have the pieces in place to help businesses communicate more efficiently in every way.”
